Types of Binary Tree :-

1. **Full Binary Tree :-** A type of BT, where the parent either has 0 children or exactly 2 children

2. **Complete Binary Tree :-** A type of BT, where the levels of the tree are completely filled except for the last level

3. **Perfect Binary Tree** :- A type of BT, where all the nodes haues strictly two children except for the leaf nodes

4. **Left Skewed Tree** :- A type of BT, where each node only contains only the left sub tree.

5. **Right Skewed Tree** :- A type of BT, where each node only contains the right sub tree-
